Information concerning dental care at school

Dear parents

Keeping your children's teeth healthy is an important job which you as a parent are confronted with constantly. The school supports you in these efforts with the school dental service.

The school dental service instructors visit almost all classes several times per year and tell the pupils how to avoid cavities and thus keep their teeth healthy:

1. Keeping down sugar consumption: Sugar is the no. 1 enemy of teeth.
2. Oral hygiene and teeth cleaning: A clean tooth will rarely get sick.
3. Use of fluoride: Fluoride toothpaste* and fluoride table salt at home.

Regular visits to the dentist are also important for dental health. Therefore, you will receive a voucher for a free check-up at a dentist of your choice every year.
This enclosed voucher can also be used for ongoing dental treatment.

We hope that this will make a significant contribution to the dental health and well-being of our pupils.

Sincerely yours,

Office for Health and Social Welfare

Dr. med. dent. Michael Krähenmann
Head Dentist of Canton Schwyz

*Kindergarden – fluoride toothpaste 0.05% or 500ppm Fluoride / School – «Junior» or «normal» fluoride toothpaste 0.15% oder 1500 ppm Fluoride

The printing of the enclosed voucher was financed by the SSO Dental Association Canton of Schwyz.
